

Muhammad Umair Hakeem

Islamabad, Pakistan

[Email](#) — [GitHub](#) — [LinkedIn](#) — [+92-332-9981207](#) — [Portfolio](#)

Professional Summary

Final-year CS student at NUML with hands-on full-stack experience shipping production-grade web apps, automation tools, and security utilities. Proven ability to build independently — from browser IDEs to blockchain systems. Experienced in Python, React, TypeScript, and Node.js, with DevOps exposure to Docker, GitHub Actions, and AWS. Selected for **Dev Weekends Fellowship 2026**.

Technical Skills

Languages: Python, JavaScript, TypeScript, C++, Java **Frontend:** React.js, Next.js, Tailwind CSS, HTML5, CSS3, Bootstrap

Backend & DBs: Node.js, Flask, Django, FastAPI, MySQL, MongoDB, SQLite, PostgreSQL **DevOps & Tools:** Git, GitHub Actions, Docker, Linux, AWS (learning), Postman, Figma

Experience

Freelance Programming Tutor — Fiverr 2023 – Present

- Delivered one-on-one tutoring in Python, Java, and C++ covering OOP, DSA, and project-based assignments; helped students meet academic deadlines and build structured programming logic.

Python & CS Instructor — Benchmark School System 2024 – 2025

- Taught Python and CS fundamentals to O-Level students; designed curriculum covering algorithms, OOP, and problem-solving with practical coding projects and assessments.

Software Development Intern (Frontend) — Air Tech Solutions 2023

- Built React e-commerce frontend with real-time product filtering, responsive UI, and state management; collaborated with team to ship performance-optimized, production-ready modules.

Technical Support Assistant — MindRidge 2022

- Managed 20+ daily hardware/software support requests; improved response efficiency and customer satisfaction by approximately 25%.

Projects

CodeSpace – Browser-Based IDE [Live](#) — [GitHub](#)

- In-browser coding environment with multi-file editing, syntax highlighting, and live Python execution via Pyodide — built with React 18, TypeScript, and Monaco Editor. Zero-install, with file system simulation and real-time output.

Blockchain Certificate Verification System [GitHub](#)

- Tamper-resistant credential platform using a custom hash-chained blockchain, React/TypeScript frontend, and Flask API — built for institutional certificate verification.

Advanced Pentest Framework [GitHub](#)

- Modular Python penetration-testing toolkit with multi-threaded network scanning, automated attack modules, and a Tkinter desktop GUI.

LinuxOS Web Desktop [Live](#) — [GitHub](#)

- Browser-based desktop environment with draggable windows, taskbar, and OS-like UI — built entirely in vanilla JS, HTML5, and CSS3.

ModernShop – Full-Stack E-Commerce [Live](#) — [GitHub](#)

- E-commerce platform with product listing, cart, and checkout; serverless backend via Netlify Functions, React frontend with Node.js.

Education

BS Computer Science — National University of Modern Languages (NUML), Islamabad 2023 – 2027 (In Progress)

Relevant coursework: Data Structures & Algorithms, OOP, Database Systems, Computer Networks, Software Engineering

Certifications & Training

- Dev Weekends Fellowship 2026** — Selected (Competitive fellowship for emerging software engineers)
- CompTIA Linux+** (In Progress) — **CompTIA PenTest+** (In Progress) — **AWS Certified DevOps Engineer – Professional** (In Progress) *Fully Funded Advanced Professional Training*
